REALLYTICS.AI

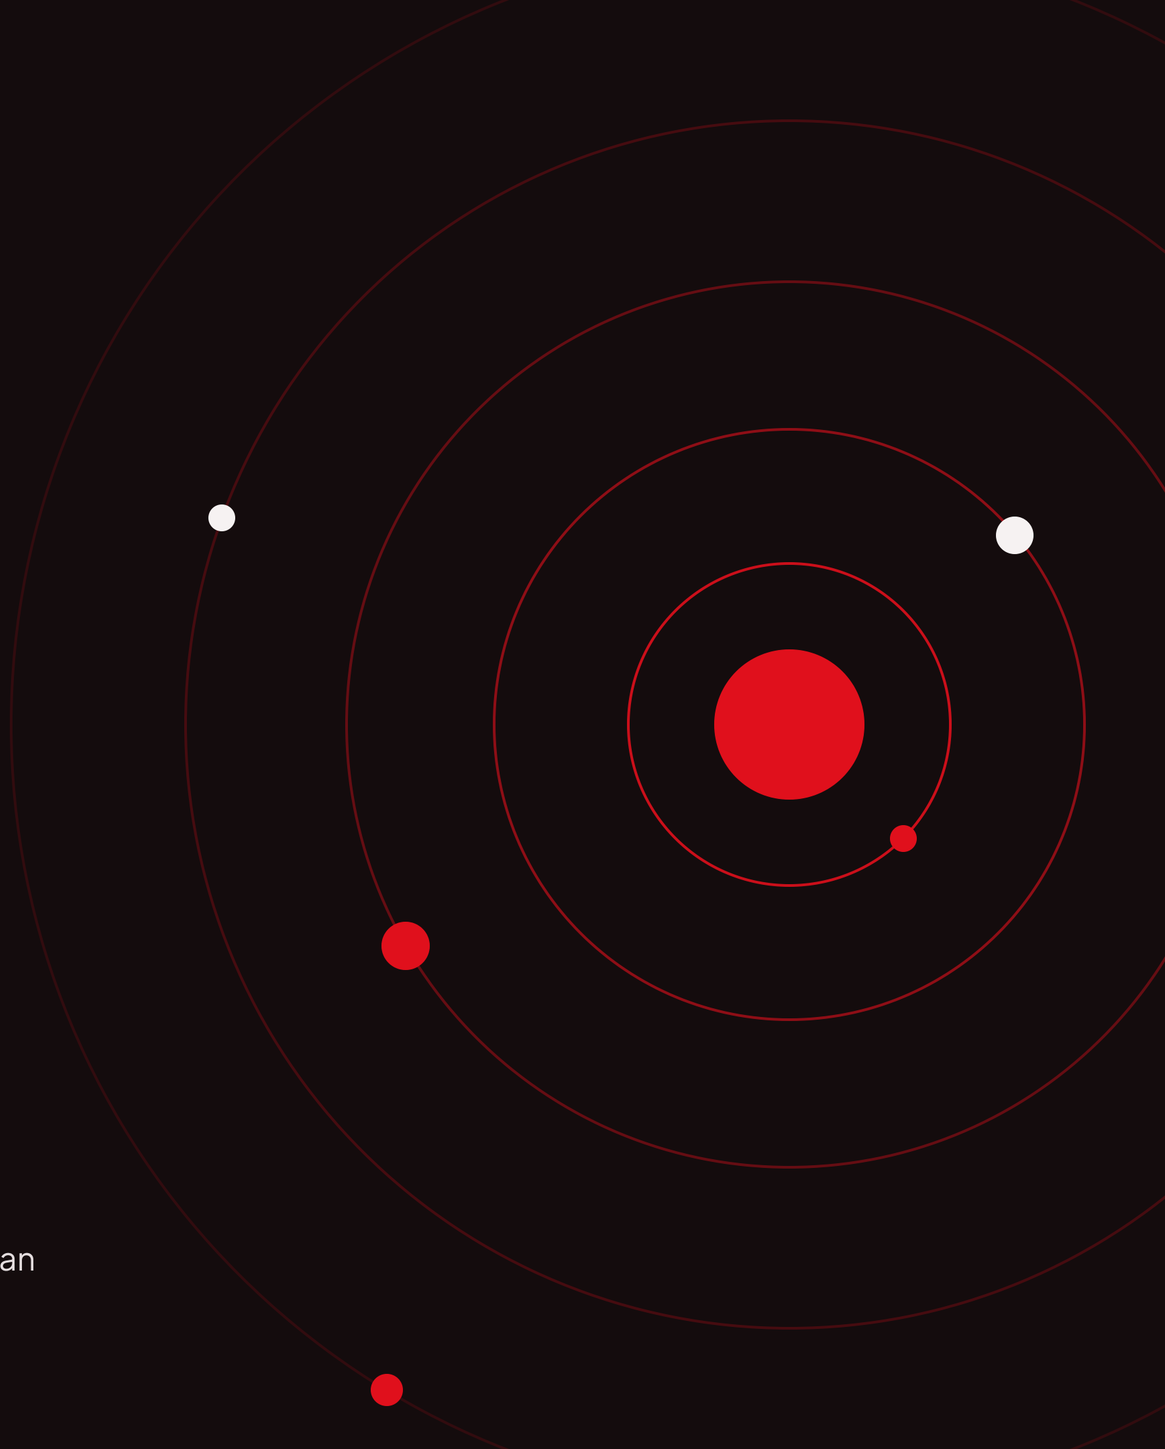

REAL TIME ANALYTICS

GENERATIVE AI FIRST COMPANY · 2026

We don't sell AI. We make your work easier.

Automation built on Generative AI, delivered with numbers you can measure.

reallytics.ai · United Kingdom · Saudi Arabia · United States of America · UAE · Pakistan

Everyone wants AI. Few are ready for it.

The data isn't ready

Most teams only learn their data can't support AI once the project is already late.

Tools are sold, not outcomes

Vendors pitch products. Few show what changes in your day, or what it saves.

Advice from non-experts

Plenty of people sell AI. Far fewer have shipped it to production.

WHAT WE BELIEVE

AI won't replace your people. It will make them exceptional.

We help teams use AI well, and we help them tell real practitioners apart from people who only sell AI.

02 · HOW WE WORK

Discovery first. Then proof. Then production.

01

Data Readiness Assessment

We map your processes and check whether your data can support AI.

02

Proof of concept

You see AI working on your own workflow before you commit.

03

Build and deploy

Production delivery on your cloud, your servers or fully offline.

04

Keep you current

As models and tools change, we keep your team up to date.

Discovery shows the value before anyone pays for a build.

03 · WAYS TO WORK WITH US

One team. Three ways to engage.

AI services

Custom Gen AI and automation, from discovery through to production.

Agents · RAG · Voice · Document AI

Staff augmentation

Vetted engineers from Pakistan's top universities, working inside your team.

AI/ML · Data · Cloud · Full stack · QA

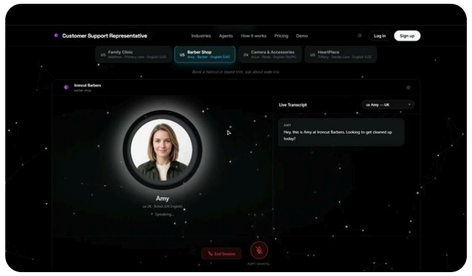

Flagship products

Proven platforms we adapt to your process: voice agents, chatbots and assistants.

Deploy fast · Tailor to fit

Our products show what we can do. The value is in what we build with them for you.

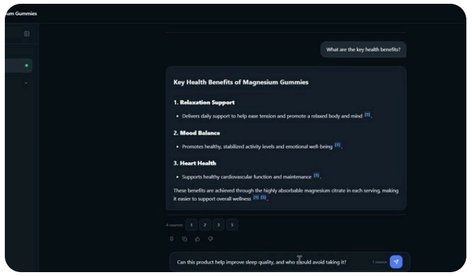

See them working. Then we tailor them to you.

Customer Support Representative

An AI calling agent that answers, books and records every detail.

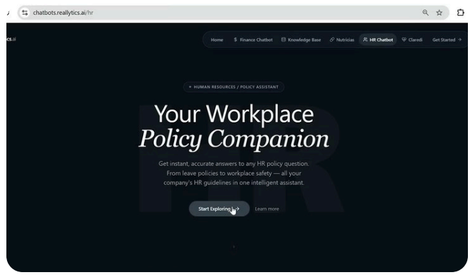

Watch demo →

Clinical Triage Chatbot

Answers patient questions from approved sources, with citations.

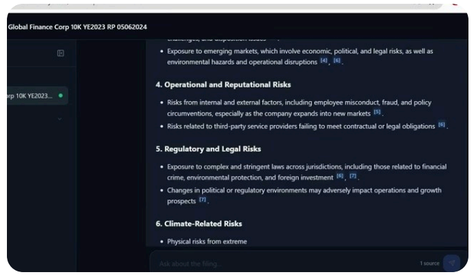

Watch demo →

Human Resource Assistant

Instant answers to any policy question, for every employee.

Watch demo →

Finance Chatbot Assistant

Reads long filings and answers in seconds, sources attached.

Watch demo →

05 · VALUE IN PRODUCTION

We sold outcomes, not software.

£600K

saved every year

What AI-driven governance and documentation saves our customers annually.

60

pages, answered in seconds

A sales team's chatbot reads 60-page documents in seconds, so their customers get fast replies.

Full

customer intake, not empty forms

Our voice agents fixed empty customer responses for a global chocolate maker.

06 · WHO USES IT

In production with global enterprises.

CSR voice agent

World's leading chocolate, gum, mints and confectionery maker

A go-to destination for premium blue-collar apparel

A multi-clinic healthcare center

An online neurology practice

Knowledge chatbots

The biggest US player among global pressure and temperature instrument makers

A prominent Australian football family company, founded 1852

Internal comms bot

A New York-headquartered multinational in point-of-sale payment technology

07 · PRIVATE DEMOS

Our heaviest work isn't in public decks.

These solutions began with a Data Readiness Assessment and are now proprietary. We demo them live, on request.

Order entry automation

Multi-agent intake, matching and validation, with a human review step.

Governance and documentation

Automated product and compliance documentation from scattered sources.

Contract automation

Extracts typed and handwritten fields, with source review built in.

08 · WHERE WE DEPLOY

Your cloud, your servers, or your site.

Cloud

AWS, Azure and Google Cloud.

Offline and on-premise

For data that must never leave your building.

On the ground

Our engineers on site, working with your team.

Invited by **AWS UK** as guests for exceptional performance with their internal team across multiple clients.

09 · TALENT ENGINE

Pakistan's best engineers, connected to the world.

Reallytics is also a platform for young Pakistani talent. We choose the best graduates from top universities and train them on real enterprise work.

Top universities
Graduates from Pakistan's leading programmes

Internal selection
Our own process filters for the best

Enterprise training
Real delivery with senior

Your team
Ready from day one

10 · GLOBAL PRESENCE

Sales near you. Engineering at scale.

USA
MSP partners who outsource work to our team

United Kingdom
Sales team on the ground

Saudi Arabia
Sales team on the ground

Dubai, UAE
Sales team on the ground

Pakistan
Engineering and talent centre

Enterprise delivery across North America, Europe, the Middle East and Australia.

11 · PRICING

You pay for time and people. That's it.

Scope
Set during the Data Readiness Assessment

→

Team
The right roles, and only as much of each as needed

×

Time
An agreed duration, including testing and UAT

=

Your quote
Clear, itemised, agreed before we start.

No licence traps and no black-box pricing. You pay for the service you receive.

Led by people who build, and teach.

Sheikh Muhammad Qasim

Founder · Enterprise Solution Architect

- **Claude Certified Architect** by Anthropic, with an MSc in Data Science
- **8+ years**, from Machine Learning Enthusiast to Enterprise Solution Architect
- Led enterprise ML at **NorthBay Solutions**, an AWS Premier Partner
- **20+ Gen AI engagements** across North America, Europe and the Middle East
- Mentor to hundreds; leads a **200-engineer AI agents cohort** at Andela
- The team: **multiple Master's degree holders**, focused on Gen AI for 4 years

NEXT STEP

Let's find the first process worth automating.

Start with a Data Readiness Assessment. We'll show you where AI fits, what it saves, and prove it on your own workflow.
